DETAILED ACTION

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by
 J. E. McElligott (U. S. Pat. 2,731,576).

Referring to claim 7, J. E. McElligott discloses a three-phase generator (Φ 1, Φ 2, Φ 3 in figure 5), comprising:

- a winding packet (15) that is penetrable by a rotating magnetic field;
 and that
- a number of winding (a', a", b', b", c', c", d', d", e', e", f', f") of the winding packet (15) is respectively connected together into at least one phase (Φ1, Φ2, Φ3 in figure 5) at which a generator voltage is tapped;
 - i. the winding (a', a", b', b", c', c", d', d", e', e", f', f") is comprised of a number of parallel wound winding wires (figure 4);

Art Unit: 2834

- ii. out of at least three parallel wound winding wires of a phase
 (a', a", b', b" in figures 4 and 5), at least two (a', a") are
 connected to separate phase terminals (31) at each of which
 a partial generator voltage is tapped;
- iii. the windings (a', a", b', b", c', c", d', d", e', e", f', f") constitute a main winding (a formed by a' and a") and the windings constitute an auxiliary winding (b formed by b', b");
- iv. both windings (a, b) of a phase (Φ 1) are connected electrically parallel to one another (figure 5);
- v. all the windings (a', a", b', b", c', c", d', d", e', e", f', f") are located in a star-shaped configuration (figures 2 and 5) and are connected with one another in a center point (37);
- vi. the main winding (a) and the auxiliary winding (b) of the winding packet (15) each has three phases (Φ 1, Φ 2, Φ 3 in figure 5);
- vii. the main winding of each phase (Φ1, Φ2, Φ3 in figure 5) has one winding and the auxiliary winding of each phase (Φ1, Φ2, Φ3 in figure 5) has one winding;
- viii. the main windings (a) and the auxiliary windings (b) each have two opposite winding ends;
- ix. each main winding (a) and each auxiliary winding (b) has one of the winding ends, which faces the star-shaped

Application/Control Number: 09/486,307

Art Unit: 2834

configuration (37), with which the windings (a', a", b', b", c', c", d', d", e', e", f', f") are connected with one another in the star-shaped configuration (at 37);

- x. the main windings (a) and the auxiliary windings (b) each have winding ends (31-36) which face away of the starshaped configuration (37) and each is connected with a phase terminal (Φ1, Φ2, Φ3 in figure 5);
- xi. at winding ends (31-36), which face away of the star-shaped configuration of the windings of the main winding (a) and of the windings of the auxiliary winding (b), an output voltage which is separate from one another is produced; and
- xii. the main winding (a) and the auxiliary winding (b) are connected electrically parallel to one another (figure 5).

Referring to claim 8, J. E. McElligott discloses that the windings (a', a", b', b", c', c", d', d", e', e", f', f") are constituted by a common conductor bundle (figure 4).

Referring to claim 9, J. E. McElligott discloses that the main winding (a) has at least two parallel connected winding wires (a', a").

Referring to claim 10, J. E. McElligott discloses that the auxiliary winding (b) has at least one winding wire (b', b").

Response to Arguments

Applicant's arguments with respect to claims 7-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Guillermo Perez whose telephone number is (703) 306-5443. The examiner can normally be reached on Monday through Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on (703) 308 1371. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305 3432 for regular communications and (703) 305 3432 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308 0956.
